NEXT MEETING

The next transnational project meeting for the FLIMCO project will take place in Poland in April 2020, as DANMAR as the hosts

THIRD MANAGEMENT MEETING IN AUSTRIA

After the **Financial Literacy in Marginalised Communities (FLIMCO)** project successfully gained Erasmus+ funding in 2018, and kicked off in Salerno, Italy in October 2018, the project partners have been working hard to develop the initial intellectual outputs, and to ensure that the project remains on track to achieve its goals.

The 3rd transnational meeting took place in Austria on the 24th and 25th September 2019, hosted by SPES.

Following the consortium's progress of the development of the Handbook on the relationship between financial literacy and cultural norms, the partners have finished the **Handbook on the relationship between financial literacy and cultural norms of marginalised communities**, the proof reading and translation has begun. Partners are going to be gathering feedback from the project's target groups to improve the outputs based on user input.

The initial steps to start developing the financial literacy Framework and curriculum have begun, and having completed the initial research into financial literacy curricula in partner countries, the development of the financial literacy Curriculum content is in progress. This forms the basis of the final project output, which is the e-course and tutorial for the e-course, which will tie all of the outputs together.

The curriculum will be finished by the end of 2019, and will be ready to insert into the platform, which will be ready by the end of March 2020, in time for the second piloting phase during the latter part of 2020.
